

Information Security

PM Group is an international project delivery company, providing engineering design, project management, construction management and consultancy services across a variety of sectors.

At PM Group our objective as professional service providers is to contribute to and align our business practices with internationally recognised information security standards with the objective of securing our information assets.

PM Group is committed to securing our information assets and we achieve this by:

- Maintaining an effective Information Security Management System to manage information security risks internally within PM Group and in respect of PM Group's involvement in all of our client projects.
- Having a defined set of Information Security Objectives that are reviewed annually.
- Effectively using leadership, recruitment, training, communication, lessons learnt and management controls to ensure our services and operations are aligned to ISO/IEC 27001:2013 principles to meet or exceed the defined Information Security objectives, contractual commitments and legislative requirements.
- Ensuring continuous improvement activities are carried out to effectively manage Information Security risks relevant to PM Group's operations.

We are committed to reviewing our Information Security Management System and associated Information Security Objectives annually, taking into account current and potential future business requirements.

PM Group Information Security Policy Doc no. 051-PL-003 is also available to all personnel on the company intranet.
